

The advertisement features a large background image of a pipe repair on a corrugated metal roof. A large pipe is wrapped in white Rapp-it bandage. In the top right, the 'Rapp-it' logo is in a red oval, with 'Pipe Repair Bandage' written below it. On the left, a list of industries is provided. At the bottom, two smaller images show the application of the bandage to a pipe. The entire background is a solid red color.

Rapp-it Emergency Pipe Repair

1
Apply RAPP-IT STEEL PUTTY to leak site and mould.

2
Apply RAPP-IT BANDAGE over the Steel Putty.

3
A successful repair in 30 minutes.

Includes Rapp-it Steel Putty for an Even Stronger Repair!

SAVE \$1000's ON COSTLY DOWN TIME!

Rapp-it is a roll of fibreglass bandage impregnated with water-activated resin which is ready to use once the foil pouch is opened. You simply immerse Rapp-it in water for 10 seconds, then apply by wrapping around the damaged area. A successful repair can be achieved in 30 minutes.

A leaking or damaged pipe could threaten to shut down your entire operation which could cost you thousands of dollars in delays. Leaks can happen anywhere, anytime and without warning. There's no better product for instant on-the-job repairs. No wonder BHP and Rio Tinto stock and use Rapp-it.

It's essential to cover yourself and your company by stocking Rapp-it emergency repair kits. You never know when you'll need Rapp-it!
